Mar 2021- Dec 2021

High School Diploma
West Clermont High School
2014-2018

ABOUT ME

Full Stack Web Developer

I entered the field because I have always been interested in applications, games, and Mobile Apps. Going through the CareerFoundry bootcamp turned that into a passion. I am looking forward to starting my career and learning as much as I can and to be at the forefront of my field.

EXPERIENCE

CareerFoundry Projects

My-Flix Project: **2021**

My-Flix is a Web Application that used the following technologies: Angular, HTML, TypeScript, JavaScript, and MongoDB for the back end. This project showcases information on movies, allow users to create, update, and delete an account, and save a movie to their favorites.

Texter: **2021**

Texter is a native messaging application. The creation called for the following technologies: React-Native, Expo, Gifted Chat, and Firebase Firestore. The project allows users the ability to create a screen name and choose a background color. Users can send data such as pictures and location information as well as standard SMS messages.

MEET Project: **2021**

MEET is an application with the goal of showcasing events in local cities. This project uses TDD to make a serverless PWA with React. User stories were applied in the process of designing the application and Google APIs were utilized for the calender. Users of this app can: filter events by city, show/hide details of events, use app offline, and view a chart showing amounts of upcoming events by city.

Outback Steakhouse: **2016 - Current**
